### **Operating the Wheel Drive:**

Turn the key to the up position to raise the boat lift. Turn the key to the down position to lower the boat lift.

### **Pendant:**

We offer an optional 15-foot or 20-foot pendant that can be purchased and plugged directly into your motor.

### **Off-Season Storage:**

We recommend our storage cover for your motor if you are going to leave it sit outside during the winter months. Our storage cover will breath and let moisture out while your not using your motor.

**Power Requirements: AC Motors:** All power used on your dock or lift needs to be GFI Protected at the shoreline. Extension Cords must be 12/3 and under 150 feet. Circuit Breaker 15 AMPS GFI.

**Power Requirements: DC Motors:** The Wheel Drive motor can only run on 12 Volts. Do not use 24 Volts on the Wheel Drive motor or it will ruin the motor. Running on 24 Volts will void the warranty. We recommend 24 or 27 series deep cycle batteries.

### **Maintenance:**

Our motors are self-lubricating and do not need any maintenance. If using a Solar Panel make sure to check the water level in the battery as it will evaporate over time. Low water levels can damage the battery and possibly cause it to explode if a cell leaks inside the battery. We recommend if using a solar panels to also use a charge control to prevent over charging. They can be purchased separate.
