

Press UP to go up and DN to go down. Press the light button to turn the canopy light on or off.

Press and hold the lock/unlock button until the Status and Read lights blink together to lock the control panel. Press and hold it again until the lights stop blinking together to unlock the control panel. When the control panel is locked the lights will blink for a set amount of time and then stop. The Bluetooth App will still work when the control panel is locked. **If the control panel is locked the lights will flash when you press any button on remote or control panel.**

When plugged into power the READY light will be a solid green and the Bluetooth symbol will blink blue. When you pair a phone through Bluetooth the light will be a solid blue and no longer flash. The STATUS light will turn solid red when any button is pushed.

The control panel will go into a sleep mode and the lights will turn off after a set amount of time. This will help conserve power. Press any button to wake up the control panel and the lights will come back on.

REMOTE CONTROLS

The two blue remote controls that come with the unit are already paired. To pair another remote control, press the canopy light on/off button and the lock/unlock buttons down together on the front of the control panel for 1 - 2 seconds. Then press any button on the remote control. Do the same thing to pair multiple remote controls. You can have a maximum of 5 remote controls programed at one time. If you need to clear the board for any reason hold down the Canopy Light and the lock/unlock button for 15 seconds. This will erase all remote controls and phones paired to the control panel.

Bluetooth:

To activate the Bluetooth pairing sequence hold the UP and DN buttons on the control panel at the same time until the blue LED stays solid. See the attached IOS or Android instructions to finish pairing the phone to the hydraulic control panel.

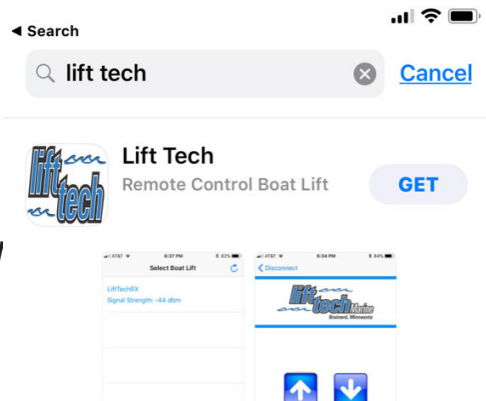

Low Battery Issues:

The battery will need to be above 10.8 volts to run the control panel. If you have any issues try charging or replacing the battery.

**If your neighbors have a Lift Tech Marine unit make sure they're not using their lift while you're programming.* The app will not work in Dark Mode.*

1. Go to the App store and search for Lift Tech and download the app. Once the app is downloaded on your phone, open the app and continue.

2. To activate the Bluetooth pairing sequence hold the UP and DN buttons on the control panel at the same time until the blue LED stays solid (picture below).

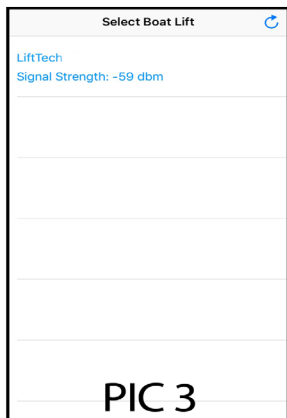

3. After you have activated the bluetooth sequence look at your phone and Tap the  button in the upper right hand corner of app. (See pic 2) LiftTech should now appear like in (pic 3). Tap on the Lift Tech Signal Strength and the screen should now look like (pic 4). Now tap on the pair option.

4. Once paired and connected to a Lift Tech receiver, the screen similar to (pic 5) will show the remote control options.

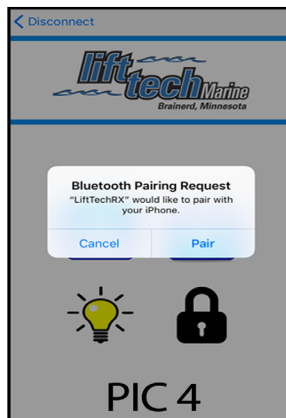

5. To rename your lift tap on Rename in the top right corner of the phone app.

PIC 2

PIC 3

PIC 4

PIC 5

6. **UP**..... Pressing and holding this button will raise the lift.
DOWN.... Pressing and holding this button will lower the lift.
LIGHT..... Pressing this button will turn your canopy light on or off.
LOCK..... Hold for 5 seconds to lock or unlock the control panel.

NOTE: When done operating the lift, for security and IOS battery purposes, it is advised to disconnect from the Lift Tech receiver. To do this tap <disconnect in the upper left corner to be returned to the screen shown in pic 3.

ANDROID Guide For Control Panel

If your neighbors have a Lift Tech Marine unit make sure they're not using their lift while you're programming.

1. Go to Google Play and search for Lift Tech Marine and download the app. Once installed open the app.

2. To activate the Bluetooth pairing sequence hold the UP and DN buttons on the control panel at the same time until the blue LED light turns solid. (See picture below). You will have around 15 seconds to add your phone. If the blue LED starts to blink, repeat the steps.

3. Press the scan button on the top right of your phone. (See PIC 1)

4. When the phone finds the motor it will look like PIC 2.

5. Press on the Lift - Signal Strength that comes up on the phone to pair it.

6. Once the phone is paired it will look like PIC 3. You are now done pairing your phone with the control panel. If you want to rename your lift simply press the rename tab on the top right of the app and a box will come up like in PIC 4. Rename it to what you want and hit Rename to save it.

PIC 1

PIC 2

PIC 3

PIC 4

7. **UP.....** Pressing and holding this button will raise the lift.
DOWN..... Pressing and holding this button will lower the lift.
LIGHT..... Pressing this button will turn your canopy light on or off.
LOCK..... Hold for 5 seconds to lock or unlock the control panel.
